

Safe or unsafe?

Let's think about
what we
put into our mouths

What things do we put into our mouths?

drinks

food

toothpaste

medicine

sweets

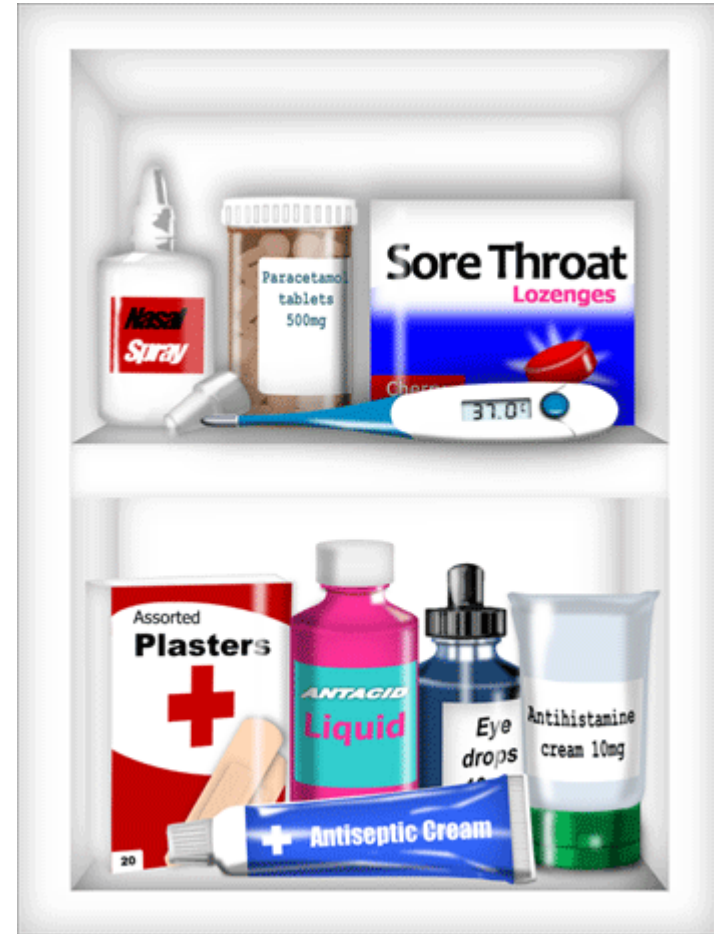

tablets

Safe or unsafe? How can we be sure?

What should we do?

Medicine should be kept safely in a medicine cupboard out of reach.

Do you recognise any of these cleaning products?

Where are they kept?

What are the rules for keeping safe?

Talk about this picture with your talking partner.

Cut and stick these pictures to make a safety poster.

What have we learnt about keeping safe?

- Never put anything into your mouth that you are unsure about
- Only eat or drink safe things given by an adult you know well
- If you find medicine or tablets, always give them to an adult straight away
