

**DAILY EARLY YEARS CENTRE
HOME LINK ACTIVITY
SESSION 2020/21**

The EYC staff are inviting all parents to participate in our first home link activity of the session. We have been saddened this term with the ever-changing government restrictions which have prevented us from offering our termly stay and play sessions for children and families.

Context for Learning: Space/Solar System

Over the past week the children have shown a great interest in learning about 'Space' and as we cannot accommodate parents within the centre- our aim is to bring the centre to your home with this first activity.

Activity

To research and create your own space themed model using recyclable materials which can be found within the home environment

You and your child may wish to create one of the following:

- Planets**
- Space Rocket**
- Galaxy**
- Stars**
- Astronauts**
- Moon**

As practitioners we value opportunities to involve parents and encourage them to become active participants within their child's learning with the hopes that we can continue to work together to provide your children with the best experiences possible.

The EYC staff would appreciate the final models to be photographed and emailed to megan.gibson@south-gyrshire.gov.uk where Mr Hislop, will choose the winning model and a special prize will be awarded to the lucky winner!

GOOD LUCK! 😊
