Philosophical question of the week: Can one person change the world?

Given the gloominess of the news, you'd be forgiven for thinking that there's not much point in doing anything much, and that anything you do won't make a difference. What about if you just try to make a difference in your tiny bit of the world? There are loads of kids who have done just that and changed laws and lives. Ask yourself what change would you like to see in the world? Then- how can you go about making it happen?

Unless someone like you, cares a whole awful lot, nothing is going to get better, it's not. - The Lorax
