

Evidence of 'Claim-Support-Question'

Claim - ~~the~~ version 1 is better ~~because~~ than version 2.

Support - I feel that Sam Smith's version is better because in my opinion his voice is better and his voice also suits the music better. Also the singer in version 2 does not pronounce her words properly. I also feel the version 2's singer has got too deep a voice for the song.

Question - My questions ^{are} could Sam Smith sing the song the way version 2 does and may be pick the tempo up? Could ~~the~~ version 2 be better if she pronounced her words properly? And also could Sam Smith sing the song as good as he does if the tempo was picked up.

Arguments! 😊 😞

Claim: version 1 is the best

Support: I think version 1 is better because v2 is very old fashion and the instruments would not appeal to people now a days and the tempo is slower than v1 and v1 is more modern. The dynamics on v2 are quite high at points and v1 is got better dynamics. I believe that v1 would be more popular. The voices are different cause hes a boy but i feel like the girl cant sing. It just really depends on what you like and i think v2 should be really changed the gender words.

questions:

Claim - My claim is that version 1 is the best.

Support - My support for my claim is that the style of the music was better and the way his voice was. Another reason I feel version 1 was better was because the music video was more interesting. Another support for my claim is that I prefer the instruments in version 1 better than the ones in version 2.

Questions - Do you think the ^{could} dynamics sound better in version 2? Why do you think the style was good? Did you think the music video in version 2 was boring? Why did version 2 have an old style for a new song? Why did version 2 have lots of different instruments?

Support
Question

Claim
My claim is that the style of version two suits the lyrics better.

Support
I like the style in version two but I wonder if it would suit Sam Smith's voice. I also think that Sam Smith's voice is better. I also feel that Sam Smith's video is more appealing as there is more happening on screen.

Questions
I wonder why Sam Smith never chose to do a jazz / classical beat.

Claim I think Version 1 is the best.

Support I think that version 1 is better because I think Sam Smith's voice suits the song better. I think that having piano drums and a choir sounds better than brass instruments, a double bass and a piano. I also like the tempo of the first one better. I feel like the version 1 video is better because there is more happening in it.

Questions Why did version 2 use an old style for a new song?

Claim-Support-Questions
'Stay with me'

Claim
In my opinion version 1 is better than version 2.

Support
Sam Smith Version:
Pros
- It has a steady, infectious beat that makes you want to sing along.
- He has good range with his voice.
- Sam Smith has a better understanding of the song.

Cons
- There aren't very many instruments in it.

Other version:
Pros
- It has a bluesy feel.

Cons
- She has a very nasal sound.
- She is very loud for the song.
- It is too upbeat!

Questions
Why is her voice so nasal??

Claim, Support, Question
Claim ~ Support ~ Question

Claim
My claim is version 1 is better than version 2 of 'Stay With Me.'

Support
Version 1 Pros
* It has a fast, steady beat
* It has a modern feel to it
* It uses piano and a choir

Version 1 Cons
* It has repetitive vocals

Version 2 Pros
* The instruments in the background suit the song
* She is original

Version 2 Cons
* There are very old-fashioned vocals
* There is an off-beat

Therefore I prefer version 1 because I prefer the modern style of music
