

P7 CLASS NEWS

LITERACY

This term we have been doing a daily writing task to develop a variety of writing techniques. From writing step by step instructions to a creative paragraph inspired by an image.

We have almost written more about Harry Potter's Wizarding world than JK Rowling herself. We have created a magical store, how to plant and care for a magical plant and of course how to make Potions with Professor Archimedes.

We have gone old school with extra spelling work in class to help give us that final push and improve our confidence in spelling.

Our final THW topic has allowed us to recreate the story of 'the Old Mill' and we created some fantastic blackout poetry.

P.E.

This term is super busy with so many competitions. We have already won two cups for football. We have had a brief introduction to football thanks to the nice weather we had briefly. We have our Maidens tournament coming up and the P7's have been preparing with lunch and after school sessions for netball and football.

We have also been competing in sports champion events and the house games. We can't catch a breath! For sports day we are going to host it as more of an event by having different stalls and activities for families to enjoy after the races. Might as well make an afternoon of it!

P7 CLASS NEWS

MATHS

The P7's have definitely embraced and finally come to terms with the fact that they now love maths! We have had a great term finishing off fractions. We have even created our own Mario Kart maths game.

We designed the track, came up with the rules and have had a blast playing it. It has been amazing to see the ideas the P7s have thought up. They have covered so many maths topics from measure, times tables and probability.

We have done so many science topics which have allowed us to apply all the numeracy skills we have learned.

SHARED LEARNING

The P7s were so excited to have everyone in to showcase all the great things we have been learning. I think they were most excited about making the parents do their times tables.

It was great to have everyone together and create some happy memories.

ASSEMBLY

Primary 7 have been working so hard on their leavers assembly. They have written the entire script by themselves and have finished making their props. We are now at the rehearsal stage, so we can fine tune our performance. We really can't wait to invite you all along as we say our fine farewell to a school we will never forget.

REMINDERS

Friday 24th & Mon 27th - HOLIDAY- Enjoy!

Wed 29th May - Maidens Tournament

Friday 31st May - 1.15pm Maidens Ps Sports Day

HARRY POTTER

We created real potions this term with Professor Archimedes. The 7s had some amazing ideas and I am sure you loved seeing their creations when they brought them home. Their writing and engagement for these lessons was even more magical than the potions.

SCIENCE

This term we have completed a lot of work on STEM topics. As a class we love solving a problem and being hands on with our learning. Here are some examples of circuit boards we have made. We have also been experimenting with bridges, how different building techniques can improve their function. After our shared learning we are going to continue working on our rubber band car challenge.
