

11th September 2023

North Carrick Community Benefit Company (NCCBC) are very excited to be supporting the proposed development of an Eco park that would be unique to the area, and become a great place for school children to visit for environmental education sessions and outdoor play!

The NCCBC are working collaboratively with the Minishant Social and Leisure Group (MSLG) to explore the potential creation of an environmentally friendly Community Building and 'Eco Park' within the woodland area surrounding the football pitch on School Road. This facility would serve the wider community as well as the residents of Minishant.

Proposals for an Ecological Walk and Park in the woodland around Minishant's football pitch date back to March 2020 and a feasibility study has now been commissioned. Community Enterprise and MSLG will be working to consider the local community's needs while assessing potential opportunities for the site! If you would like to know more please contact Jennifer at Community Enterprise by email:

The more support there is from the wider community for this concept the more likely it will be to progress to the next stage.
