

Retrieval Pyramid

Submitted by Music Department

The Retrieval Pyramid task works great as a plenary.

The task is flexible in how you can apply it, for example Question 1 could have one answer, Question 2 could have two answers and so on. Alternatively, Question 1, being at the top of the pyramid, could be worth more “points” and this could add an element of challenge and competition into the task.

The Retrieval Pyramid task works well across a range of topics/subjects.

It is best to print the sheet on A3 so there is enough space to write in the answers.
