Safe Data
Part 1

Today we are going to consider the value and risks of data sharing online. We will look at the importance of **protecting your own and others' privacy online.**

Who Would I Tell?

	My name	My weight	My biggest secret
My family			
My best friend			
My teacher			
A friend of my parents			
Someone I just met			
My doctor			
Everyone in my year			
Everyone on the internet			

The Results Are In!

Are the results what you would have expected?

Do you have any concerns on what you are sharing right now?

THE DATA LAB
value from data

Let’s Discuss

- What data would "you" share?
- Is there any information you would prefer to keep private?
- Does it matter who is asking or what they want it for?
- Has the videos changed your mind on data you would share?

Let’s Discuss

What about other people's data?

Do you realise that when you share your WhatsApp conversations or text messages, photos and other people's information is in there too?

Is this OK?

THE DATA LAB
value from data

Let’s Discuss

- Is the data being shared more or less sensitive than in the previous videos?
- Why is it being shared?
  Is that valuable?
- What safeguards were put in place before the data was shared?

Let's Discuss

Has your opinion of data changed?
