READING COACH

WHAT IS READING COACH?

Reading Coach as part of immersive reader provides students with personalized and independent practice of words that Reading Progress identifies a student has mispronounced.

Reading coach is also available as Reading Progress assignments in Microsoft Teams

READING COACH

Reading Coach identifies the five words that were most challenging for each individual student and gives them a supported opportunity to practice the words again.

Use the tools to get more comfortable with the word.

- Select **Hear** the word to listen to the word read to you.
- Select **Stretch** the word to break the word into syllables.
- Select **See** a picture to open an illustration of your word.

READING COACH RESULTS

Review your mistakes. Select any highlighted word then press **Jump to word** to see and hear how you read it.

Select **Listen to this word** to hear how it is supposed to be pronounced.

Attempts shows how many times the word was practiced.

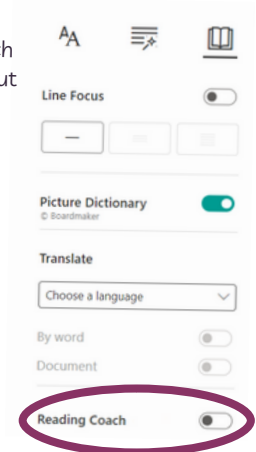

Tools used indicates which tools (if any) were used tools to help them practice.

USE IN IMMERSIVE READER

In Immersive Reader, go to the Reading Preferences pane,

Enable Reading Coach to practice reading out loud and receive focused practice.

The Play button changes to a Microphone button. Students can select the Edit button near the Reading Coach toggle to customize parts of the coach including the voice, feedback style, and more.

READING REPORT

Once the student selects **Let's read**, a 3...2...1 countdown appears, and practice begins.

The student reads out loud for as long as they like while Immersive Reader "listens" to their performance.

When finished, the reader selects Stop, and a reading report immediately provides data on their reading speed, accuracy, time spent reading, and any words to practice.

WHERE CAN I USE READING COACH?
