

A Quick Guide to: Typing Feedback

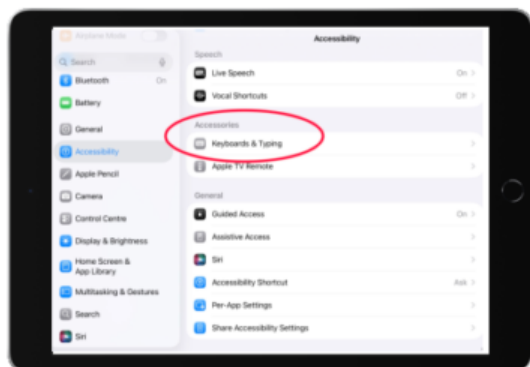

Typing Feedback allows users to hear what they are typing, either by word or by character.

Words are spoken after space, return or punctuation is pressed. Character feedback is given immediately after typing but delay can be changed. Typing feedback work with both onscreen and separate keyboards.

Set up

1. Settings
2. Accessibility
3. Scroll down to **Accessories**
4. Keyboards & Typing
5. Typing Feedback
6. Slide toggles to turn on preferred feedback options

Speak Predictions

To use Speak Predictions, ensure toggle is turned on in Settings (see above).

When typing using the on screen keyboard, press and hold the predicted options to hear them before inserting into text. This should be used alongside Speak Selection feature.
