**This week marked a huge leap** forward for the completion of the new Bird Observatory, with the boat *Havara* arriving on Wednesday morning with the bulk of the furniture for the new building. The day was met with perfect conditions – a calm sea, blue skies and not a drop of rain – definitely deserved after all the weather delays back in the earlier stage of the project. A team of keen helpers arrived at the pier early on Wednesday to transport the goods from the pier to the building, then up the stairs and into bedrooms with dozens of beds, dressing tables, chairs, dining tables, sofas and even a few washing machines! A few hours and all were in place, or at least inside and safe from the elements!
