Instructions:

1. Choose a challenge level (above - ranging from bronze to platinum)
2. Roll the dice and complete the exercise that correlates with the number you rolled (exercises below). For example, if you chose the silver challenge level and roll a 1 then you need to complete 15 jumping jacks. Check the images above if you're unsure of what the exercise is.
3. Once you complete that exercise, cross off the amount of numbers you rolled on the number grid (to the left), so if on your first roll, you roll a 4, you would cross off the numbers 1,2, 3 and 4. If on your second go you roll a 2, you would then cross off the numbers 6 and 7.

Repeat the above steps until you reach 100. First to get to 100 wins the game!

On your marks, get set, GO!
