story.

Date: 12/10/23

Signed: Mrs Winters - M E

How do the animals in your class learn to survive in their habitats? Do they have any special adaptations? How do they survive in their habitats?

A fox is a carnivorous mammal. It has a long tail and a bushy tail. It is a predator and it eats small mammals, birds, and insects. It is also a scavenger and it eats dead animals. It is a very smart animal and it can survive in many different habitats.

Hedgehogs are very smart animals. They can survive in many different habitats. They are very good at finding food and they are very good at surviving in the winter. They are also very good at surviving in the summer. They are very good at surviving in all kinds of weather.

Bears are very smart animals. They can survive in many different habitats. They are very good at finding food and they are very good at surviving in the winter. They are also very good at surviving in the summer. They are very good at surviving in all kinds of weather.
