Trick or Treat

L.I. Write a story with a spooky setting

It was a dark foggy evening and the children were getting ready in their halloween costumes. Once they were ready for trick or treating they walked to the street called ghost lane. When they came back they went to bed. ~~next day they did their general home routine then~~

The next day they did their morning routine then they ate their sweets but the sweets were poisoned. Once they ate their sweets they died.

When their parents came in their room they called the ambulance. Then the children were ~~buried~~ after the ~~check~~. The mum creid in her room and the dad watched the news. The news was about prisoner zombies. Then, something broke the door. It's zombies!!!!!! They almost bit Dad then it bit dad then it kept on spreading. The End Happy Halloween

buried

PRISOM   NEIGHBOURS

Information Writing Features	Teacher
Understand the purpose and the Audience (who and why they are writing)	
A title to interest/inform the reader	
An introductory paragraph	
Use notes to organise information	
Subheadings used to organise information	
Information written in paragraphs	
Topic specific language used	
A concluding paragraph bringing the main information together	
Sources of information acknowledged	

★ Using a subheading.

☆ Writing information in a paragraph.

Continue to use subheadings and write information in paragraphs next time too.

25.10.23   Robbie Argue

Victorian Jobs for Children

Chimney Sweeps

In Victorian times young boys would be chosen to clean chimneys. The children were told to climb up narrow and dirty chimneys to clean them. When they got stuck up the chimney it was quite hard to move and it would hurt their bones and they would suffocate because of the soot. When they went up the chimneys they would get cut knees and elbows and if they wanted to stop their boss would light a fire to make them go faster and make it even harder to breathe. The soot in the chimneys caused eye infection and breathing problems. They started at age 5 and work to 10 or 11. After 1892 it was against the law to use children as chimneys sweeps.

You did really well today Robbie ☺

Chatelherault Primary

26.10.22 rain forest Layers

L.I. to write a satissactory
conclusion

Introduction Introducon:

The rain forest eco systems is almost as
healthy old astimes and it still grows Healsy
unique and uniqilise? botte the warm tropical
temperaturain forests and cool temprat rainforests
has 4 layers. even though each Ldyer is
dissrent they all help each other thrive
and grow!

Forest Sloor:

The sirst layer is the forest sloor, a
Dark and damp peice os land were susit and
seeds srom upper layers sallis
the animals that live there don't eat
the surit or seeds the sood will decay.
environment because os it's dark and wet enviornmet
perfect it makes the persict eco system sor
bug lise, reptiles such as snakes and
Lizards but also mammals libe deats and
Large cats! the decaying plant lise
that has sell srom the trees go into
the ground to be new plant.
as well as animals it is the home
bacteria to Bakerria. as much as this Dark
and dim part os the eco system
miserable can seem cold and misstebley some
important times, it's still a important step sor
plants to grow! In addion only 2%
os sunlight makes it to this layer!

Under story:
colourful
The most colorsull layer os them
all, the Under story is like a wonderland
so strange and magical plant lise
colours wonderousp lants with adnormal colots
grow here such as the orchid.
many There are manny small caves which
perseral the persect home sor a
samily os bats. this the largest layer
and a sair bit os it has alot os
bugsmore then any other layer). This
lively and bright layer is also a big
part os the eco system.

Canopy Canepy:

The canepy is the thrid layer
is silled to the brim with a
and plants with 60-90% os the
in the rain sorest. all the anim
live close together as the trees grew
beside right besid each other. this layer is
habitat innabet rwithpulersull birds to slow
which sloths wich the trees previed home
to. this lively layer is one layer
away srom the top but still as
important

Emergant:

Last but not least is the
tall emergant! where trees can be a
tall as sky skrapers, animals must
