12

STEM

During the first term, the children have been focusing on living and non-living things in STEM. Primary 6 and 7 children have also taken part in an aerospace challenge, which resulted in the children getting through to the next round, with drones being sent to the school - watch out for pictures of the next round coming in the new term!

Finally, for our STEM challenge week, the learners carefully designed and made their own rafts.

Aerospace Challenge:

Scan the QR code below for more information on the Primary 6 and 7 aerospace challenge!

Winter STEM Home Learning Challenges

This is completely optional - we know that family life can be extremely busy. Scan the link below for some fun challenges!

Term 2
NEWS

Engineer Visit:

An engineer will be visiting in Term 2 to help us with some STEM projects and to talk to the learners about his career in engineering.

Electricity:

The learners will have a focus on learning about electricity in Term 2 - keep an eye out for some pictures!
