What was I doing?

Today, we worked on our gardening skills. Isla listened well as we discussed what a seed is, the steps needed to plant it, and how to care for the plants.

Isla carefully filled her plant pot with soil to create a bed for the seeds. We then counted out and planted five strawberry seeds, and finally, Isla watered them.

We hope you have fun growing your strawberry plant at home. Please place your plant pot near a window indoors and water regularly. Once your plant is grown, you can plant it in the garden."

"I was planting strawberries for the garden. It needs water and sun to grow."

— Isla

What did I learn?

Process of a plant

Caring for plants

Fine motor skills

Environmental awareness
