

Kirklandpark Primary Parent Council

Parents as Partners

Welcome To Kirklandpark Primary School

We would like to take this opportunity to raise awareness of some topics which are regularly discussed by the Parent Council

Your Journey To School

Active Transport we support SLC 'Walk, Wheel, Cycle' campaign and ask all parents and carers to participate in active transport to and from school.

Park and Stride when it is not possible to leave the car at home, the car park at the top of the George Allan park functions as a park and stride for the school. Using this will help reduce congestion around our school.

Scotland bans parking on pavements the Transport (Scotland) Bill introduced a national ban on pavement parking in 2019. Let's keep our pavements safer and more accessible to all.

Anti-Bullying

Anti-bullying week we have actively promoted this anti-bullying alliance event for several years.

Parents as Partners there are many ways you can help promote anti-bullying behaviour at home. The anti-bullying alliance is a great place to start.

Internet Safety

This is an ever changing subject

Your need for internet safety strategies will change dramatically over the next seven years.

Keep up to date talk to your child regularly about how they use the internet; what they like using it for will change as they grow.

Be in control set up parental controls; review apps before they are downloaded; set screen time limits or time cut offs; you will get to know what best works for your family.

Keep talking make sure your child understands how to stay safe online and know where to go for help if they don't.

Be a partnership as your child grows, work with them to see which parental controls still work and what responsibilities they can take on to become in charge of their own online safety.

Thinkuknow. Internetmatters. Net-aware.

If you are interested in these topics or there are others you would like to discuss, please send us an email or join our meetings.
