

Dinosaurs

Dinosaurs lived millions of years ago on Earth, before people. Scientists think they became extinct 65 million years ago when an asteroid hit Earth and changed the weather.

Dinosaurs were reptiles. They lived on land and laid eggs. There were many different kinds of dinosaurs. Some dinosaurs were small and some dinosaurs were enormous. Some dinosaurs had armour-plated skin and some had fur or feathers. Some dinosaurs walked on two legs, like Tyrannosaurus Rex, and some walked on four legs, like Stegosaurus.

Some dinosaurs were herbivores and some dinosaurs were carnivores. Herbivores ate plants and trees and carnivores ate meat (other dinosaurs).

Questions

1. When did dinosaurs become extinct?

2. What does **extinct** mean? Tick one answer.

- old
- no longer alive
- big
- alive

3. What did herbivores eat?

4. Name a dinosaur that walked on two legs.

5. Number the sentences to show the order they come in the text.
The first one has been done for you.

Some dinosaurs were small and some dinosaurs were enormous.

1 Dinosaurs were reptiles.

Some dinosaurs were herbivores and some dinosaurs were carnivores.

Some dinosaurs had armour-plated skin and some had fur or feathers.

6. Would you like dinosaurs to be alive today? Explain your answer.
