

Making bubbles

1

Stir four spoons of washing-up liquid into a small tumbler of water.

2

Use some thin wire to make a loop with a handle. Dip the loop into the mixture.

3

Make sure the loop is covered with the mixture.

4

Blow steadily through the loop. The mixture stretches around the air you blow out to make a bubble.

Answer in sentences.

- 1 What do you mix together to make the bubble mixture?
- 2 When you take the loop out of the bubble mixture and look at it carefully, what do you see?
- 3 What happens when you blow steadily through the loop after it has been dipped in the mixture?
- 4 What is inside a bubble?
