B Mr Bodgit is doing some DIY from his new book.

- 1 He cut 0.65 cm and 0.86 cm from a length of wood. How much was this altogether?
- 2 His room was 6.2 m long and 3.9 m wide. How far is it all the way round his room?
- 3 His room is 2.46 m high and a roll of wallpaper is 10 m long. How many pieces can he cut from a roll?
- 4 He needs to make two curtains, each one needing 1.88 m of fabric. How much fabric must he order?
