

St Cadoc's Primary School Improvement Plan 2026.27

Learning, Teaching and Assessment (Numeracy and Mathematics)

What we are focusing on:

Helping pupils truly understand mathematics rather than just memorising steps.

What this means for your child:

Lessons will focus on building deep problem-solving skills in maths and helping students clearly explain their thinking and ideas.

Curriculum Pathways (Numeracy and Mathematics)

What we are focusing on:

Ensuring pupils deeply master concepts before moving on, using a mathematics mastery approach.

What this means for your child:

Learning will be structured so that every pupil thoroughly understands foundational maths concepts, leading to greater confidence and long-term success.

Wellbeing, Inclusion and Equity

What we are focusing on:

Adapting our classrooms and support systems to make sure every single pupil feels safe, included and valued as our school community grows and changes.

What this means for your child:

A welcoming environment tailored to support the unique needs of every learner so they can thrive both personally and academically.

Self-Improving System

What we are focusing on:

Encouraging teachers and staff to continuously learn, practise new teaching methods together and support one another through programs like "Plus 1" and Peer School Reviews.

What this means for your child:

Teachers will constantly work on improving their own teaching skills, ensuring pupils benefit from the highest quality of instruction possible.

St Cadoc's Primary School

Our values: Faith, Aspiration, Resilience and Respect
