

Health and Wellbeing

In health and wellbeing, we will continue to use the Emotion Works programme. Identifying emotions, what that emotion looks like and how it feels.

In SHANARRI, we will look at Achieving and Respected. In achieving we will be look at what an achievement is and how we can achieve more individually and as a team.

In respected we will look at what respect for others looks like but also respect for equipment etc. We will put this into practice and make sure we are also ensuring respect for ourselves.

RME

We will be learning about 'Learning from others'.

We will look at different bible stories like 'Joseph and his Coat of Many Colours', 'Daniel and the Lion's Den' and 'Jesus Feeds the Five Thousand' and see what we can learn from these stories.

Next Steps in Learning

Throughout the year, your child will have ind steps in their learning to focus their learning and challenge them.

After discussions with you, and with the team, we will choose targets that will be appropriate for your child, their age and their abilities.

Curriculum for Excellence

Nursery follows the CfE using a rolling programme at Tinto. Nursery is responsive to the children's learning and enquiries, catering for the individual.

If your child has any new interests at home, we would love to know! It would be great to incorporate it in to their learning.

Let us know at the door or through the journals.

Literacy and English

We will be looking at the story 'Head, Shoulders, Knees and Toes' and incorporating that into Talk For Writing. Eventually, we will see if we can change the song to different body parts. They will need to listen to each others' ideas and think about words that sound the same (rhyming).

We will also look at poetry this term.

Every week we will continue to have a 'Word of the Week' and this will be taken from each pod's 'Book of the Week'.

Targets

RME - Shares thoughts and asks and answers questions to show and support understanding

Science - Describes how the rotation of the Earth in relation to the sun gives us day and night.

Numeracy and Mathematics - Children will be able to look at the differences between coins and identify some.

Health & Wellbeing - Develop their moving skills through energetic play (achieving).

Language and Literacy - Hears and says rhyming words and generates rhyme from a given word

Numeracy and Maths

Children will continue to explore numbers everyday throughout their play. We will continue to have a 'Number of the Week' where we can look more closely at the number and what it looks like in lots of way (fingers, dice, money, dots, numeral, numicon and on a ten frame).

The children will also learn about money. We will look at coins and their similarities/differences. This will hopefully lead to us knowing some of the coins.

Science

We will learn about 'Space' this term and be child led with this. We do hope to cover the Earth's rotation around the sun and how the moon rotates around Earth.
