

### Health and Wellbeing

This term we will continue our learning about our emotions through Emotion Works. This is really helping to develop the children's social skills in the varying situations that they meet in P2/3. We will look carefully at regulating ourselves when we feel extreme emotions.

Within SHANARRI, we will focus on Healthy. We will look carefully at the effects medicines have on our bodies, describing ways in which we can keep exercise keeps your healthy and the effects this has on your body.

### Science & Social Studies

This term, we will be learning about enterprise. We will learn about local organisations and how they help provide for the needs of our local community.

We will try to run our own little enterprise, working out amounts of money that we need to buy items and start to understand that we can't always afford the items we want. We will look carefully at the roles in business and try to understand how important each role is to success.

## Tinto Primary School

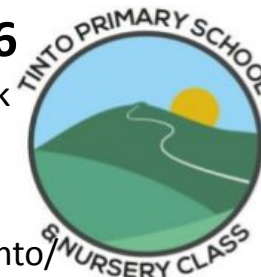

### Primary 2/3 Mrs Bowden

### Target Setting in the Classroom

Throughout this year, your child will be setting a series of targets for themselves, challenging their learning, and striving for excellence. The targets which your child sets will stem from our termly overview targets and be personalised to specific areas which your child may wish to challenge themselves in or have found challenging in their learning.

As our children achieve their targets, and celebrate their success, a selection of their work will be added to their individual online pupil portfolio which you can view at any time using the QR code. This forms a record of your child's development throughout their time at Tinto Primary School.

### Numeracy and Mathematics

This term we will learn about:

- **Measure** - weight, capacity and length where we will look closely at the units we need eg ml, g and cm.
- **Data Analysis** - we will conduct surveys and put the information together in a way that helps us to analyse it.
- **Angles and symmetry** - we will use angles to help us navigate as we move eg a right angle turn, 90 degrees, a quarter turn. In symmetry we create symmetrical pictures.
- **Chance and uncertainty** - we will learn how to describe the likelihood of events occurring and using this to guide your decisions.

### Expressive Arts

In **Music**, we will continue to be supported by Charanga Music. We will explore genres of music and use this to learn about pitch, tone, melody, rhythm, and develop our knowledge of instruments.

In **Art** we will focus on different visual elements that artists use.

### Language and Literacy

**Reading:** This term the children will be looking at Stonelaw reading strategies that help the children with their comprehension by looking at: connecting, self questioning, visualising, comparing and synthesising.

**Spelling:** The children will revise their phonological awareness and knowledge of phonemes through active spelling and context based practical activities.

**Writing:** This term we are focussing on imaginative and informative writing. The children will choose topics that interest them to apply these writing skills.

**Talking & Listening:** The children will continue to develop their talking and listening through creating their own 'talk' for their peers, with a focus on fact and opinion.

**Modern Languages:** The children will continue explore French. We will start to look more at writing French and creating a fact file about ourselves in French.

### Technologies - STEM

Our STEM challenge this term will be 'Lifting Weights' - pulleys and levers.
