Home Learning Grid

P5/6 4th– 17th May 2020

Here are some suggested activities for you to try at home. These will be updated on the website every fortnight. <https://blogs.glowscotland.org.uk/st/braeheadprimaryschool/>

Literacy – Spelling

Suffix (words that end with) **-ion**

How many words can you come up with that end in **ion**. E.g. **Cushion**, **explosion**, **resolution**.

Create your own list of 10. Challenge yourself and add words to the list that you find difficult to spell.

Practise these, just like we do in class and get an adult or sibling to test you.

I wonder what the longest word is that you can find ending with the suffix **ion**....

Literacy – Writing

P6- Next year you are going to be have a P1 Buddy to take care of as part of your senior role in the school.

Create a brainstorm of how you think will make a good buddy next year and what extra responsibilities in might include. Think about how daunting it might be being a new P1 student and how they might be feeling.

P5 (& P6 if you would like too).

Write a letter to someone you might be missing or even your teacher explaining; *What you have been doing during this time, what you really miss doing and what is something you look forward to doing when lockdown is over.* Remember to include thoughts and feelings.

Literacy – Reading

Does your family have a favourite story that is shared over and over again? Or do you have a favourite book that you just LOVE reading.

Task- With this book are you able to choose one (or all of the following)

- Read aloud to your family members, include expression and remember to pause for punctuation. You could even video and upload to SEESAW.
- Create a comic strip for this book- remember to include speech bubbles and main points.
- Interview your family members and find out why they enjoy this book.

Remember to do your daily reading for **at least 45minutes**. If you are stuck for reading ideas have a look at www.getepic.com there are a lot of free e books.

Numeracy and Maths

Are you able to create your own fraction sundae or something similar? Have a look at the picture for some inspiration. Be creative, it doesn't have to be a sundae.

Numeracy and Maths

Planning for a Party

Attached below is an activity to plan for your own party.

Numeracy and Maths

Use a pack of playing cards to try this game.

Each player draws two cards from the centre pile. (Or someone can deal two cards to each player.)

Players multiply the two values and tell everyone the answer. If the answer is an odd number the player keeps their cards e.g. $9 \times 5 = 45$. If the answer is an even number the player returns the cards.

Each player keeps adding the value of the cards they have won until one player reaches 50 and becomes the winner.

If you don't have any cards you could make some or use a some dice.

HWB

Now we have looked at the traffic light system that is on food labels, you should have identified that food containing high red quantities should be a sometimes food and food with more green labels should be eaten more often.

- Are you able to identify and sort foods into categories of those we should **eat often** and those we should **eat less** regularly. This could be a list/poster/ diagram – you choose!
- From there are you able to choose a food from your **eat often** category and design a poster promoting that food. Think about adding an attractive heading, facts and nutritional information.

Creativity

Rainbows have been the theme for showing support to key workers, especially the NHS.

Are you able to create a unique rainbow picture without actually drawing a rainbow? Have a look at the examples below to help you.

Outdoor / Active

Remember to be active every day in some way.

How many Jumping Jacks can you do in 1 min?

Time yourself each day and record your results. I wonder if you can improve on your previous score each day.

Remember to use SUMDOG , TTRS and TOPMARKS as well. I have set challenges on SUMDOG for you to complete. Have a go and see how you get on. You can upload any of these tasks to Seesaw (if you would like). I would also love to see what else you have been doing at home.

Planning for a Party

Imagine lockdown is over and you are able to plan a party for you and 5 friends (6 people altogether).

You have a budget of £30.

You do not have to spend the whole budget but, you can not go over.

Use the price list below to look at different types of food and drink available.

Think about:

- what food and drink you are going to provide
- what quantity of each item you will need
- whether you are providing a range of food items
- what entertainment you might provide.

Remember to show your working.

Main Food	Number in pack	Price per pack
sausage rolls	12	£1.90
small cocktail sausages	24	£1.49
cheese pizza	6	£1.85
ham sandwiches	10	£5.00
egg sandwiches	15	£4.00

Main Food	Number in pack	Price per pack
cheese sticks	10	£1.29
Burgers	4	£2.00
scotch eggs	20	£1.25
hot dogs	10	£1.50
cucumber and carrot sticks	6	£0.52

Drinks	Price per glass
orange squash	5p
cola	18p
lemonade	12p
fresh orange juice	15p
blackcurrant juice	14p

Special items	Price
10 party hats	£2.00
