Home Learning Grid

P5/6 June 1st-June 12th

Here are some suggested activities for you to try at home. These will be updated on the website every fortnight. <https://blogs.glowscotland.org.uk/st/braeheadprimaryschool/>

Literacy – Spelling

There is a 9-letter word hiding in the grid below, can you find it?

You could also see how many words you make using 3 letters or more.

You could think of your own 9-letter word and make one of these grids for family member.

E	L	R
F	O	W
N	U	D

Literacy – Writing

Who is your hero?

During this time there has been a lot of hero's (especially those people who have been putting their own lives at risk to help others).

"A hero is a person of distinguished courage or ability, admired for his or her brave deeds and noble qualities."
Who is your hero?

A hero can be a family member, an athlete, an actor, an activist, a historical person, or even a fictional character.

1. Who is a hero to you?

2. Be a detective and learn more about your hero's life and accomplishments. With adult supervision, use the internet or conduct an interview to learn more about your hero. Some good topics to research include childhood, education, talents, and shining moments.

Literacy – Reading

Remember to do your daily reading for **at least 45minutes**. If you are stuck for reading ideas have a look at www.getepic.com there are a lot of free e books.

JK Rowling has just released a few chapters from her new novel **The Ickabog**. The first few chapters are free to read online. You could read them or get an adult to read to you.

<https://www.theickabog.com/read-the-story/>

There is also a competition running to help with illustrations for the book. Have a look and maybe you could enter....

Numeracy and Maths

Problem Solving

Paul and Anna have agreed to work for their Mum over the holidays. The pay they get will vary.

Anna will get \$10 for the first day she works and two more dollars for every day she works after that.

Paul will get \$1 for the first day he works, but for each day he works from then on, his pay will be doubled.

Who would you rather be and why?

To help decide who you would rather be use a certain number of set days such as the children could work for 5 days, 10 days or 20 days. You choose.

Numeracy and Maths

Fraction friends

Write down the names of **at least 5 people** you know. Beside each person's name, see how many fraction or percentage facts you can record about the letters in their name. For example;

For the name **Peter**

- 2/5 of the letters are the same (e,e)
- 1/5 of the letters is a `t`
- 60% are consonants (p,t,r)
- 40% of the letters are vowels (e,e)
- 80% of the letters are lowercase letters (e,t,e,r).

You might also like to investigate your name and the names of people in your family.

Numeracy and Maths

Math Problem of the Day You could create and solve your own math problem using the numbers of the day!

1. Find today's date - the month, day and year. For example: March 17, 2020 you would have the following numbers to play with: The month, March = 3 Day= 17 Year = 2020.

2. Create a math problem that involves all of the numbers.

Decide if you want to count the year as one number in the thousands (the year 2020 is 2,020 in a math problem!) or break it into two numbers (so the year 2020 could be the number 20 and the number 20 again). You could invite a family member to join you in creating the math challenge of the day.

HWB

We are considering how best to support our children make the transition back to school in August.

We thought that photographs showing what life in lockdown has been like for your child would help support discussion on this topic.

In line with GDPR could you write on the back of any photographs you submit: "I give permission for this photograph to be shared with staff and children at Braehead Primary School" followed with your signature. Thank you.

Creativity

Below are some examples of some nature art.

Are you able to create something similar or use your imagination to create something different?

You could use a mixture of natural resources and textiles.

Outdoor / Active

A few weeks ago, we did a 1 min challenge with jumping jacks. So many of you sent in wonderful, motivational results, with lots of improvement over the two weeks.

Are you able to create your own 1 min challenge to do every day for two weeks?

You could even do two separate challenges for each week.

Record your results like we did with the jumping jacks to see if you improve over time.

Remember to use SUMDOG , TTRS and TOPMARKS as well. I have set challenges on SUMDOG for you to complete. Have a go and see how you get on. You can upload any of these tasks to Seesaw (if you would like). I would also love to see what else you have been doing at home.
