Your partner gives you a number e.g. 3 and you respond (in your best robot voice) with their number after it's been through the Maths Bot = 7. Keep going until they correctly guess your rule. 	Place your bets (but don't actually bet anything!) With a partner, estimate different challenges and then see who's right.  A: I think it will be 50 steps from the living room to the bathroom B: I think it's on 39 steps. Then do the steps together to see who's closest. E.g. I think it will take 20 mugs of water to fill the sink basin / I think it will take 20 seconds to do 25 star jumps.
