

Moving

Moving was hard for everyone. There were hundreds of boxes to be moved from Callander to Strathyre. When we moved back to the school before Christmas Class 1 and Class 2 were ready for us. The cupboards and drawers were filled with everything we needed to do our work but Class 3 which is our Hub was still filled with boxes to get put in the store cupboard. Everything there eventually got put in the cupboard and class 3 started to get transformed into our new HUB with a robotics corner, a maker station, cool library with bean bags, computers, play trays which are filled with things to make a story up and there is going to be an outdoor leaning table. Outside everything is the same, we still have a play area out the front and the top woods are still the same with trees, paths and hill to run up. The friendship hut is still there but it is filled with things until springtime. We lost our 'chocolate factory' in the bottom woods but we have a new one at the very top of the school grounds and we have been given buckets and spoons for it. Our new school is great.
