

Robotics

We went to the Robotics competition at McLaren High School. Tabitha, Anna, Violette Mackenzie and myself had to build a robot and programme it to go around a course themed like space. Mr Martin helped us as it was very difficult to programme and it took lots of tries to get it right. We were very nervous about the competition as we had never done anything like this before. We went round all the entries and praised them all. In the competition we came third.
