

AAL

AT KIRKNEWTON PS

Connecting School Devices

- Our AAL network is now switched on
- Security
- Skoolbo, Brainpop, Glow, Twig/TigTag, ebooks (pupils with ASN), photographing and uploading work, as well as internet research

BYOD

Bring Your Own Device

What is BYOD

- BYOD is simply that pupils are allowed to bring their own device to school
- Learning focus
- Not an expectation

Why BYOD

- Personalisation of learning
- Pupils already know how to use their own devices
- In addition to school devices, not instead of

How pupils use devices and the internet to help them learn

- P6 Pupil

Devices i use: Ipads, My phone, laptops and my kindle.

How I use them: I play educational games, i go on things like yammer, i use things like sumdog and spelling city, and i make my learning fun and enjoyable

- Primary 7 Pupil

Maths games are fun :)

Examples of work...

- <https://sway.com/aCZBwhZCj9WqVm7N> Sway about Space (done independently for fun)

- Pointalism created by a pupil at home and photo shared - feedback from 15 classmates

- Icons created at home (follow up from work in class).

What BYOD should look like in the upper primary classroom

- Some pupils may have their own devices, some may be using school devices
- Planned/incidental uses
- Not device specific
- Use of Glow to share learning and work
- All devices used in a safe and responsible way

What BYOD should not look like in the upper school classroom

- Some pupils left out
- Pupils all working on the same type of device
- Pupils sharing personal devices
- Use of specific apps/games all of the time

Our expectations

- Frequency
- Responsible use
- Trust

No pressure/school devices

- Primary 1- Primary 4 will only have access to school devices (at least 4 iPads in classrooms plus class laptops plus access to timetabled 'lower class in a box' trolley)
- Primary 5 - 7 - 6 school iPads plus class laptops plus access to timetabled 'class in a box' trolley
- Primary 5 - 7 - the opportunity to bring own devices to school regularly by the end of the school session

Pilot

- Primary 6 on a Monday and Friday
- Pupils in P5-7 with identified Additional Support Need (every day)
- 4 week block 21st November – Friday 16th December
- Review use during pilot and plan for future

FAQ – Who is responsible for my child's device?

- Pupils are responsible for their own devices, including the walk to and from school
- Pupils will not be allowed to use their devices outwith the school building (unless taking part in outdoor learning with their teacher)
- Consequences will be put in place for misuse of devices, particularly when the device belongs to someone else (sharing devices will not be allowed for this reason)
- A sturdy device case is recommended in case of accidents

FAQ

- Will devices be used instead of pencil and paper?
 - No, pencil and paper exercises important. Some children may use devices during written tasks to check spelling/look up synonyms
- Will my child use their 3G/4G allowance?
 - Pupils shouldn't be using 3G/4G allowance and will be reminded to switch to the secure network before using their device
- Is this being introduced to save teachers time?
 - No – pupils using their own devices/school devices will not save any teacher time. Whole class/group learning activities will be planned by the teacher. Pupils will have increased opportunities to share their work and learning with their peer group.

FAQ

- Will use of devices limit my child's creativity?
- What if my child does not have a device?
- What if I can't afford a device for my child?
- There will still be plenty of opportunity to develop creativity in school (through play, writing, drama, art etc.). Some creative experiences will be enhanced by use of devices (writing and recording animations, posters). School devices can also be used to record drama/music/dance/etc. that can be shared within the secure Glow space.
- There are plenty of devices in school and there is no expectation that pupils will bring in a device.
- Again, there are plenty of devices available for use in school. We would recommend that no expensive devices are brought in to school – cheap tablets work as well as expensive ones!

FAQ

- What are the safeguards put in place to restrict access to inappropriate information?
- What if my child forgets their password?
- AOQ
- Pupils will have to sign into the AAL network on both school devices and their own device. This will identify them as a pupil user. It also means that their activities can be scrutinised if necessary. Pupils will have the responsibility of logging out of AAL on school devices.
- Teachers are able to reset pupil passwords. If pupils are using their own devices then they may be able to save passwords for other resources (Glow, Skoolbo, Sumdog etc.). If pupils do this then they should be encouraged to have a password for their device.
