

Year In Review – Family Project

2020 was a year like no other! It has been said that in the future people will learn about this period in our lives, listening to all of our stories.

Your task is to create something which documents your year.

You could include:

- A highlight from each month
 - Any new hobbies?
- What changed for your family?
- What have you found challenging?

It will be a lovely keepsake in years to come and will help tell the story of your family's journey through these strange times.

We have attached a template and example, which you could add your own photos and words to. You could collate your family story in any other way you choose. For example:

Make a movie using photos and video clips of your year.

Make a poster using photos which tells your story.

Collate your photos and stories in a memory book.

We would love for you to share your family learning projects with by the end of January 2021.
