

## Health and Wellbeing

Doing nice things for others makes them and us feel good. To help people feel happy you could do an act of kindness.

You could make a card for someone in your family or a friend and post it through their letterbox or you could make a phone call to an elderly relative. You might also think of a different act of kindness that you can do.

## Technologies

We have seen some of the amazing models that you have made. Since spring is a time when a lot of baby animals are born, we thought you could make a lamb out of different materials in your house.

Interdisciplinary

## Science

We are going to have a look at baby and adult animals. Watch this clip:

<https://www.bbc.co.uk/bitesize/clips/z8x76sg>

On Education City, play the game in science and in first\* called 'Grow Up!'

## Science

We have looked at the different states of water, now it's time to look at the whole water cycle. Watch this video:

<https://www.youtube.com/watch?v=y5gFl3pMvol>

Afterwards, try draw a picture of the water cycle in your jotter. Don't worry about writing the words but remember the arrows to show the direction of the water moving.

## Outdoor Learning

You can go outside in your garden or for a walk with an adult and look for signs of spring. If you look and listen carefully maybe you will notice leaves budding, birds chirping, bumblebees flying, rain showers or warmer weather. After being outside try write an acrostic poem for spring. The first letter of each line spells out 'spring'.

Sunshine  
Play outside  
Rain showers  
Insects and birds  
New flowers  
Green grass
