CRITICAL SKILLS CHALLENGE THE MOTORCAR CHALLENGE

THE CHALLENGE

Cars are a major part of life and have been for a long time. For over 100 years cars have been taking humans to different places. Some are for comfort, some are for going fast but cars are everywhere! And so, your challenge is to explore the history of motorcars. Research the first car designs and create a timeline of motoring, from the first car ever to the first car in space!

Criteria	U	1	2	3	✓
You are to do your own research into the first cars. Who made them, who used them and what are the differences and similarities to today's cars?					
You should then research some of the important cars that have been made through the years. E.g. racing cars, electric cars etc.					
Create a timeline of the motor cars you have researched adding your research onto your timeline. Try to include: the first car, the first family cars, the first racing cars, the first electric and hybrid cars, and any milestones in motorcar history.					
If you can, add in information about important people in the motor car industry e.g. Elon Musk and Tesla and say how they changed the industry.					
Be creative with your timeline, you could experiment with using Sway to develop an interactive timeline, use PowerPoint, do it as a poster or act it out and video yourself doing it!					
Make sure to use your research on your timeline and write it neatly and use capital letters and full stops.					
Use different images to add more to your presentations.					
Choose your favourite vehicle from your research and explain why that one is your favourite.
