

Car Hunt

Recording Data

1	I	6	
2	II	7	
3	III	8	
4	IIII	9	
5		10	

See how many different colours of car you can spot on a local walk and record this data using tally marks. For example every time you see a red car you will put a tally mark in the red car column. Remember after you have 4 tally mark lines you score the 5th one through these lines. Make sure you count up all of your tallies at the end of the walk and write this number in the 'Total' column.

Colour of car	Tally Marks	Total
black		
white		
silver		
blue		
red
