SEPARATION IN THE EVENING
(A celestial blossom before the yellow House)
Sara Barker

Look at the air and the space the sculpture captures. Like a house of cards it looks like it could fall at any moment.

Although big, this sculpture is not very heavy.

How high could you build before it collapses?

You will need: Cardboard, Pencils, Colouring Pens, Scissors

1. Find 2 sheets of cardboard (cereal boxes would be great). On one draw an object that lives outside, a leaf, a worm or an unusual twig. On the other one draw an object that lives inside a cup, a shoe or your favorite toy. Make your drawings big, bold and colourful so they stand out.
2. When finished get creative and cut your two sets of drawings up into fantastic shapes.
3. Now start building. Find ways to slot and join your shapes together to create a 3D tower.
4. See how high you can go before it collapses?

I want more:

What would this look like if you could suspend it from the ceiling or hang it from a tree?

Share your towers with us!
