

MATHS IT!

Perimeter and Area:

A) Think about when people need to calculate area and perimeter.

What kind of people are they and why do they need to have this skill?

Record three examples.

B) Using your knowledge of measure using a ruler or tape measure, find the length and width of three objects at home (ie table, iphone).

Record these object and their measurements.

Calculate the perimeter and area.

*Extention: Two of your three objects should have measurements in decimals.

**p5/6 Home Learning****SPELL IT!**

Write a silly story using at least 8 spelling words. For an extra challenge, try to include all!

Order your words from most difficult to easiest.

READ IT!

We are writing newspaper reports in Literacy this week. With the help of a grownup, look at a newspaper, either online or in print, and read one article together. Discuss what it is about.

Reading as set in class.

ART IT!

We have used our knowledge of line, shape, tone and texture to draw a self portrait and a portrait by a famous artist.

Find another famous portrait and use the same grid technique to create your own version of the portrait. This time, in place of a pencil, try using oil, acrylic or watercolour paint, chalk, markers or another type of art media.

SHARE IT!

Discuss the class 'Learning Valley' with someone. Explain what it is, when you would use it and give examples of how it might help you.

*Be sure to explain why we called it 'Our Learning Valley'
