

Space Activities

Did you know there is a meteor shower passing earth right now!

If it dark just before bedtime tonight, maybe you could look outside your window and see if you can spot any of the shooting stars that pass by. You need to watch really carefully as they pass by really quickly! Can you count how many stars you see in the night time sky?

Can you make your own rocket ship out of recycling materials?

Where would you go in your rocket?

What would you see?

Click on the link to listen to 'There's No Place Like Space' by Tish Rabe

Why not sing this little rhyme with your family (sung to the tune of 'I'm a little teapot')

I'm A Little Rocket ★

★ I'm a little rocket
Pointing at the moon.
Now I'm getting fueled up ★
We'll be ready soon.

★ When it's time to board me ★
Then I'll say:

Blast Off! Zoom! We're on our way!

Maybe you could draw a picture of what you think you would see in space. What would the planets look like? Would there be any aliens? What would you ask the aliens?

Ask a grown up to share any pictures you draw on your Learning Journal. We would love to see your lovely art work.
