Numeracy Stay and Play

We are celebrating maths week Scotland 2024. We have lots of experiences for the children to learn maths through play. Here are some photos of our numeracy and maths provocations you will see throughout our nursery....

- **Number on our café tables, numbers at snack time for quantities of food.**

These allow our children to recognise numerals in their everyday environment.

- **We have lots on musical resources to promote maths through songs/rhymes.**

These develop children's vocabulary and use of mathematical language.

- **We have number lines throughout our nursery environment both indoors and outdoors.**

These support children to touch count forwards and backwards in a number sequence.

- We have different sizes of resources around the nursery areas.

These provide opportunities for measuring and developing children's concept of size, capacity and volume.

- We have our nursery calendar and daily routine wall.

These develop children's understanding of routines and time.

These are only a small selection of ways we develop your child's numeracy and maths skills. We hope you see many more!
