

DEANS PRIMARY SCHOOL GARDEN STEM CHALLENGE

The weather over the next few weeks in the garden is forecast to be beautiful so we want to set you a STEM Challenge which gets you outside and helps you to make your garden or outdoor space pretty.

Using any recyclable materials you have at home (Cardboard boxes, materials, bottles, milk cartons) create a practical product which can be used in your garden. Your product may be used to plant flowers in, feed the birds or attract bees – you can decide.

Do a bit of research and see if you can be inspired.

Make your garden product as colourful as you can! If you cannot find any materials to help you build a garden product, then get outside with some paper and any art materials you have in the house and draw a picture of your dream garden space!

Good Luck and we cannot wait to see your models and pictures!

When you have finished, please email them to [\(email address\)](#)

Good Luck!

The Staff Team at Deans Primary School
