

Exercise 17

- A**
- $20 - \square = 5$
 - $94 - 52 =$
 - $3 \times 10 =$
 - $29 + 30 =$
 - $5 + \square = 8$
 - $7 + \square = 15$
 - 429, \square , 431, 432
 - $3 + 6 + 8 =$
 - $10 - 5 =$
 - $12 \div \square = 2$
 - $42 \div \square = 6$
 - $\square \times 2 = 18$
 - 783, 780, 777, \square
 - $88 \times 10 =$
 -

B

- Seven plus sixty-two =
- 753, 748, 743, \square
- Put these numbers in order, smallest first.
555, 515, 551
- 9 hundreds + 6 units + 8 tens =
- Three children arrived early for a party.
16 children arrived at the right time.
How many children came to the party altogether?
