

Reading

For reading this week we are looking at bringing your story alive by adding sound effects. Watch this brilliant clip below and see how you can use different objects to make noises. They use their hands to create a rainstorm or a ruler to create a boing sound for a bouncy ball.

<https://mysteryscience.com/light/mystery-1/sounds-vibrations/105?code=NDEwMDY3MDQ&t=student#slide-id-0>

Once you have completed the task about the bouncing ball, find one of your favourite books or short stories (if you don't have a copy of the book; try to look on Youtube – there might be a recording).

Read through your story and try to identify places to add sound effects. Think of ways to make these sounds and experiment with different noises.

Record yourself reading some of the story and add your sound effects when you read them.

You do not have to record then whole story. Upload your short clip to assignments.
