P2 Data Handling- ANSWERS

I have been watching the number of birds eating from the bird feeders on my trees this past week.

I counted them and made a **Tally chart**.

Birds eating from the bird feeders (Title)

Day	Tally	Total
Monday	~~IIII~~ III	8
Tuesday	~~IIII~~ ~~IIII~~ I	11
Wednesday	~~IIII~~ ~~IIII~~	10
Thursday	~~IIII~~ ~~IIII~~ ~~IIII~~ II	17
Friday	~~IIII~~ ~~IIII~~ III	13
Saturday	~~IIII~~ ~~IIII~~ ~~IIII~~ ~~IIII~~ II	22
Sunday		0

Questions (Tip: remember, we "close the gate" when there are 5 of something counted i.e. ~~IIII~~ = 5. You can also use your skip counting in 5s to help.)

1. How many birds fed on Thursday? **17**
2. Which day did I see 13 birds feeding? **Friday**
3. Which day did I see the most birds feeding? **Saturday (22)**
4. Which day did I see the least birds feeding? **Sunday (0) or I'll let you have Monday (8)** ☺
5. How many birds fed on Wednesday? **10**
6. How many birds fed on Monday and Tuesday altogether? **8 + 11 = 19**
7. How many more birds fed on Friday than Wednesday? **13 – 10 = 3**

8. Why do you think I didn't see any birds feeding on Sunday?

You are just using your imagination here☺ It could be because I didn't put out any bird seed☹. It could be because I stayed in bed all day☺☺. It could be because the birds stayed in bed all day! ☺☺☺ What did you think?
