

Numeracy

I am learning to create a number line and add numbers to 10/20 and beyond.

Create a number line from 0 to 10 or 0 to 20. Make sure you form your numbers correctly.

Try to complete the sums using concrete materials or your number line, start with the biggest number and jump on the rest. Remember to jump to the next number each time.

Position and Direction

I am learning to understand and use position and direction words.

Position words:

- in front, behind, above and below

Direction words:

- Left, right, forwards and backwards.

Spy objects around the house, use position and direction words to guide your parents/carers to the object. Can they find it? Swap around and see if you can get to the object by listening to the instructions!

Here is a song with some position words. Can you think of more?

https://www.youtube.com/watch?v=idJYh_jCuyWTU

This is a video about LEFT and RIGHT.

You might want to pause it to have time to answer the questions in the middle.

P1 and P2/1

Maths Learning Grid

Week beginning 01.06.20

Make It!

I am learning to be a shoe maker.

<https://www.youtube.com/watch?v=Ey7RjzYL7ZY>

Imagine you could invent any shoe. Use your imagination to design and create a shoe for any purpose. Challenge – Can it fit on your foot?

You can also learn and practise how to do your laces too!

<https://youtu.be/ehwqhHLJY5Y?t=170>

Play It!

Sumdog and Topmarks!

There are a variety of games and challenges that can be used to support pupils addition and subtraction and some of which we use in class.

Here are some ideas for you:

Hit the button - Number Bonds

<https://www.topmarks.co.uk/>

Games:

- Addition within 10
- Make 10
- Addition within 20
- Make 20
