

Let's Practice Subtraction!

Mild

Count the pictures AND subtract.

EXAMPLE:

1 2 3 4 $4 - 2 = 2$ 1 2

4 take AWAY 2 EQUALS 2

The example shows four baseballs numbered 1 to 4. The last two (3 and 4) are crossed out with large black X's. An arrow points from the text 'take AWAY' to the crossed-out baseballs. To the right, the equation $4 - 2 = 2$ is shown. Below the equals sign, two baseballs are drawn, numbered 1 and 2. Below the numbers 4, 2, and 2, the words 'take AWAY', 'EQUALS', and '2' are written respectively.

1 2 3 4 5 6 7 8 9 10

 $3 - 2 = \underline{\hspace{2cm}}$

Three footballs are shown, numbered 1, 2, and 3. To their right is the subtraction equation $3 - 2 = \underline{\hspace{2cm}}$.

 $5 - 1 = \underline{\hspace{2cm}}$

Five ice cream cones are shown, numbered 1 to 5. To their right is the subtraction equation $5 - 1 = \underline{\hspace{2cm}}$.

 $4 - 3 = \underline{\hspace{2cm}}$

Four tennis balls are shown, numbered 1 to 4. To their right is the subtraction equation $4 - 3 = \underline{\hspace{2cm}}$.

 $3 - 3 = \underline{\hspace{2cm}}$

Three basketballs are shown, numbered 1 to 3. To their right is the subtraction equation $3 - 3 = \underline{\hspace{2cm}}$.

 $5 - 3 = \underline{\hspace{2cm}}$

Five soccer balls are shown, numbered 1 to 5. To their right is the subtraction equation $5 - 3 = \underline{\hspace{2cm}}$.

 $4 - 1 = \underline{\hspace{2cm}}$

Four hockey pucks are shown, numbered 1 to 4. To their right is the subtraction equation $4 - 1 = \underline{\hspace{2cm}}$.

Rainforest

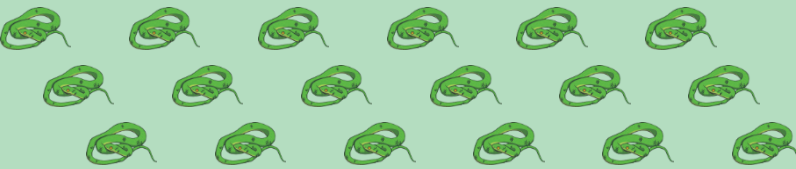

Write down the answers in the circles.

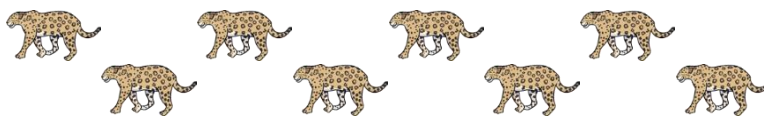

15 turtles arranged in three rows of five.

$$15 - 8 = \bigcirc$$

14 gorillas arranged in two rows of seven.

$$14 - 7 = \bigcirc$$

12 snakes arranged in three rows of four.

$$12 - 12 = \bigcirc$$

8 jaguars arranged in two rows of four.

$$8 - 4 = \bigcirc$$

12 toucans arranged in two rows of six.

$$12 - 6 = \bigcirc$$

18 monarch butterflies arranged in three rows of six.

$$18 - 14 = \bigcirc$$

14 monkeys arranged in two rows of seven.

$$14 - 7 = \bigcirc$$

11 sloths arranged in two rows of six.

$$11 - 11 = \bigcirc$$

10 parrots arranged in two rows of five.

$$10 - 3 = \bigcirc$$
