

This week we are going to ask you to produce a project about bees.

How you show us your work is up to you.

You could:

- Make an information book
- Make a poster
- An information report
- A powerpoint

Or you might have an even better idea.

# Welcome to Bee Week

We will be learning about bees all week but your project is due by Friday 26<sup>th</sup> June. You can post it to your Learning Journals, send it in an email to the school office or hand it in during lunches.

I can't wait to see what you make.

This week we are going to learn:

- How the beehive works
- How bees produce honey
- The importance of bees to our lives
- Why bees are becoming endangered and how we can help
- The bee waggle dance!

You can add in extra information of your own as well.

Extra activity – Why not follow these instructions to make your own bee finger puppet? ([Click here](#))

## Monday 15<sup>th</sup> June

Decide how you are going to show your learning and design the front cover, first slide or heading for your project.

Let's find out more about where bees live.

They live in a hive but what does one look like?

This video ([click here](#)) will tell you more. Add some information to your project about the bee hive. Think about:

- How many queen bees are there?
- What does the queen bee do all day?
- What do the rest of the bees do?
