

A Diary From Space

Amazing Fact

The International Space Station is comfortably the most expensive structure ever built.

Challenge

The International Space Station (ISS) is a space station in low Earth orbit. First launched into orbit in 1998, the ISS is now the largest artificial body in orbit and can often be seen with the human eye from Earth. It is staffed by astronaut crews from around the world.

Imagine what it would be like to spend a day in the International Space Station. What would your day be like? What would you see? What would you do?

Write a diary entry to describe this.

Use the photographs above and your imagination to add as much detail as you can.

You could also try to find out:

- how much it cost;
- who paid for it;
- how much it costs to run;
- how many astronauts have visited and from which countries.
