## Check it's For Real

- ✓ Interland: Reality River

## Protect Your Stuff

- ❖ Interland: Tower of Treasure

Pupils will learn to understand the importance of protecting their personal information online and be aware that information they put online is not necessarily safe and/or private. They will look at ways of securing their information online, and asking for help if they are concerned about their own or others' online safety.

Access the game: [https://beinternetlegends.withgoogle.com/en\\_uk/interland/landing/tower-of-treasure](https://beinternetlegends.withgoogle.com/en_uk/interland/landing/tower-of-treasure)

*Mayday! The Tower is unlocked, leaving the Internaut's valuables such as personal information and passwords at high risk. Outrun the hacker and build an untouchable password every step of the way to secure your private information once and for all.*

Once you have completed Tower of Treasure, answer the questions below.

1. What are the elements of a super-strong password?
2. When is it important to create strong passwords in real life? What tips have you learned about how to do so?
3. What's a hacker? Describe this character's behaviour and how they affect the game.
4. Did Tower of Treasure change the way you plan to protect your information in the future?
5. Name one thing you'll do differently after learning these lessons and playing the game.
6. Craft three practice passwords that pass the 'super strong' test.
7. What are some examples of sensitive information that should be protected?
