Art

Andy Goldsworthy is a sculptor, photographer and environmentalist. He lives in Scotland. He uses natural materials to make scupltures in sites in and around the UK. He has made them in forests, farms, fields, cities, mountains and more.

Sometimes they last for a long time, other times they last only a few days.

Can you make some natural art like Andy Goldsworthy?

You could use: leaves, twigs, bark, sticks, mud, flowers, stones, feathers, shells, sand, light, reflections and shadows.

What can you find that would make a good picture?

What colours/shapes/textures can you see?

What sort of pattern can you make?
