

# Communication Survey Feedback: October 2018

Following a recent Parent Partner meeting, we sent out a survey to all families from nursery to primary 7 to evaluate our approaches to communicate. 10% of families responded to the survey; a sample from each year group responded, including nursery.

4. Are you happy that the range of communication tools we use keep you updated about learning, events and news? 90% responded yes.

5. If you have selected no, can you suggest a further form of communication that PUSCPS could utilise?

- I would prefer paper copies as not always online.
- Too many different channels how secure are some e.g. Facebook

6. Are you happy with the content of the different methods of communication? 95% responded yes.

7. If you answered no, could you please suggest how could we improve the content?

- Too much.
