

Paris Problem Solving

1. A Patisserie in Paris sells 36 pastries each week.

$\frac{1}{3}$ of the pastries sold are croissants. How many croissants did the Patisserie sell each week? **12**

2. The concert hall in Paris holds 658 people. Round this number to the nearest hundred. **700**

3. A river boat runs cruises on the River Seine. On Sunday it operated 5 trips. Here is a table of how many people travelled on these trips:-

Trip	Number of people on each trip
1	15
2	22
3	23
4	14
5	21

How many people travelled altogether? **95**

4. The Eiffel Tower has 1665 steps. An adult ticket costs 25 euros and a youth ticket costs 13 euros.

a. Round the number of steps to the nearest 10. **1670**

b. How much would it cost for a group of 10 young people with 1 teacher, to visit the tower? **155 euros**
