Friday 3<sup>rd</sup> April 2020

# Easter Egg Challenge

Choose three colours and decorate the shell, ribbon and spots on the egg using one of each colour. Can you decorate the other eggs in different ways using the same three colours?

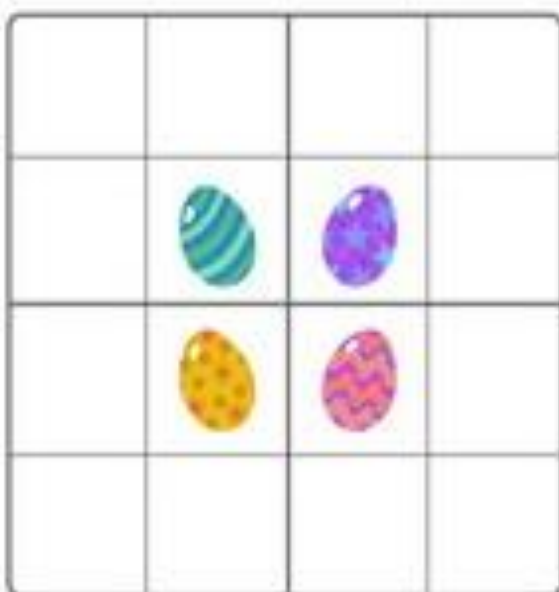

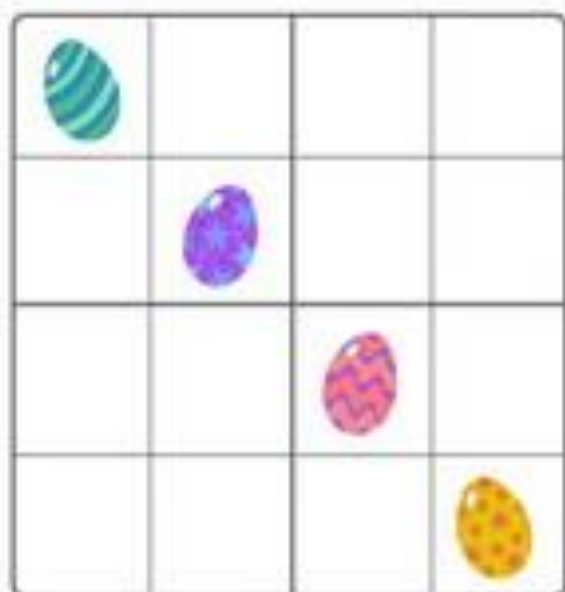

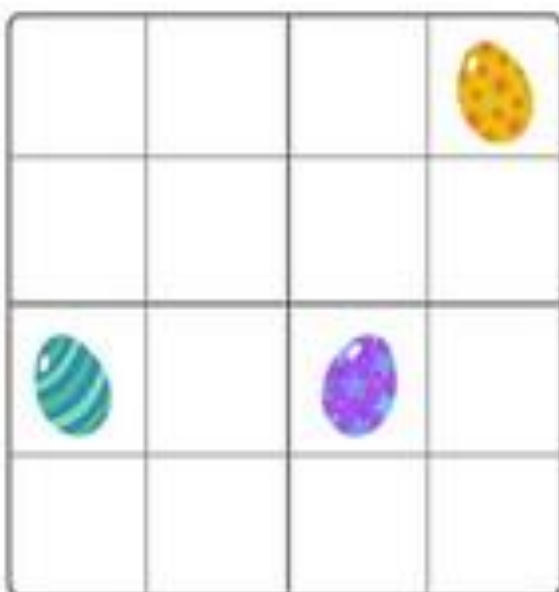

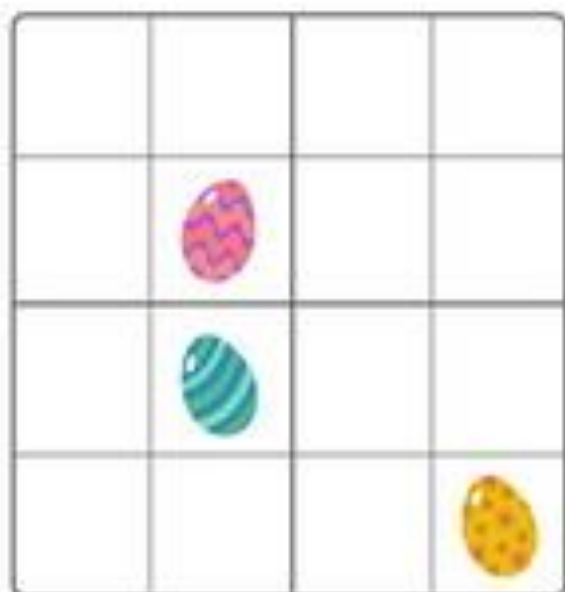

How many different possibilities are there?

# Sudoku

## Bunny's Busy Day!!!

The Easter Bunny has to deliver all the eggs to different countries by the morning. However, the Micro Bunnies need to know the exact times that Bunny is going to be in each country so that they can cross them off the schedule at the burrow. Bunny knew how long it would take him to get from one country to another but can't tell the time. Can you help?

Bunny sets off when the minute hand is pointing at 12 and the hour hand is pointing at 9.

He knows that it will take him 30 minutes to get from England to France.

He will spend 15 minutes in France then make his 20 minute journey to Spain.

He spends double the amount of time that he spent in France then leaves to make a 40 minute journey to Germany.

(How long would it then take him to get back to England? As he won't be spending time in the other countries but will travel back over the same ones to guide his way back home?)
